CVB-Office Landing Page

Project brief and full scope for the developer

Item	Details
Client	Caravan-Vermieter-Bund (CVB), contact: Detlef Scheer
Project	Custom-coded landing page for CVB-Office, with sign-up form and easy admin panel
Web address	cvb-office.de
Page language	German only (public page and admin panel)
Document language	English (simple)
Version	1.0 · 7 November 2026
Prepared by	Web Mavien (Ahmad)
Status	Ready for developer review. Please read everything before you start.

How to use this document

This document explains the whole project from A to Z. You should not need any other information to start.

Section 1 gives the short version. Sections 5 to 9 give the details. Section 13 is the checklist for the final test.

Where something is not decided yet, it is listed in Section 14 (open questions). Please ask Web Mavien instead of guessing.

Contents

No.	Section	No.	Section
1	Project in one page	9	Technical requirements
2	Background and goals	10	Content plan (who gives what)
3	Scope: in and out	11	Deliverables and handover
4	Brand and design	12	Timeline and milestones
5	Page structure and content	13	Acceptance checklist
6	Sign-up form	14	Open questions
7	Visitor flow	15	Risks and notes
8	Admin panel	A–D	Appendices: German draft copy, data model, email texts, glossary

1. Project in one page

The Caravan-Vermieter-Bund (CVB) is a network that supports people who rent out motorhomes and caravans in Germany. CVB offers its members a software called CVB-Office. It is a rental office in the cloud: bookings, contracts, vehicles and handovers in one place. The technology comes from a partner company called Smarlps. CVB sells and supports it under its own name.

Your job is to build one professional landing page for CVB-Office, in the CVB look and feel. Members can read about the product, start a free trial, or sign up. The client must be able to change texts, images, logos and prices himself in a simple admin panel.

Quick facts

Topic	Answer
What to build	1) Public landing page, 2) sign-up form with email alert, 3) admin panel
For whom	CVB members and other small motorhome or caravan renters in Germany
Main goal	More members sign up for CVB-Office, with less work for the client
Language	German only (visitors and admin panel)
Web address	cvb-office.de (separate from the existing CVB website)
Look	CVB brand: logos and colours in Section 4
Method	Custom code. No page builders such as Webflow, Wix or similar.
Payments on the page	None. The page only collects sign-up requests.
First preview	2 to 3 working days after start (design of the top of the page)
Full launch	About 2 to 3 weeks after start, see Section 12

The 5 most important rules

1. Everything the visitor or the admin sees is in German.
2. The page must look like CVB (logos, colours, tone). It must not look like Smarlps.
3. The client must change texts, images, logos and prices himself. He has no technical knowledge. Keep the admin panel very simple.
4. Smarlps is a respected technology partner. Show it in a positive way. Never show Smarlps prices and never compare it with other providers.
5. Keep the scope clean. Do not add features that are not in this document without asking Web Mavien first.

2. Background and goals

2.1 Who is the client?

The Caravan-Vermieter-Bund (CVB) was founded by Detlef Scheer, who started renting out motorhomes himself in 2015. Today CVB supports more than 1,000 vehicles in Germany. Members get insurance contracts for rental vehicles, a community, webinars, partner deals and templates. CVB also runs trade-fair appearances and events.

The existing CVB website is caravan-vermieter-bund.de. It was built in Webflow by another agency and is managed by a service provider. The new CVB-Office page is a separate website. You do not change the existing site.

2.2 What is CVB-Office?

- CVB-Office is an add-on for CVB members. In the client's words it is the digital rental office.
- It covers a booking widget for the renter's own website, vehicle management, handovers and instruction. (The client's event text also names accounting. Please confirm if accounting is really part of it. See Section 14.)
- The software is provided by Smarlps, a German company that has been a technology partner of CVB since 2026. Smarlps says its software is made and hosted in Germany.
- Members pay CVB, not Smarlps, for CVB-Office. The amount is added to the member's yearly CVB fee.

2.3 Why does this page exist?

The client wants a page where he can introduce CVB-Office to his members and let them sign up. The content should be similar in depth to the Smarlps website (features, how it works, FAQ), but written and designed in the CVB style.

2.4 Goals

No.	Goal	How we know it works
G1	More members sign up for CVB-Office	The form is easy and works on every device
G2	A visitor understands the product in about one minute	Clear headline, short sections, clear buttons
G3	The client runs the page himself	He can edit texts, images, prices and see requests without help
G4	The page feels trustworthy and professional	Clean design, German text, privacy and imprint links, fast loading

No.	Goal	How we know it works
G5	The page can grow later (2027)	Clean data structure so a link to the client's customer tool is possible

2.5 Business rules (very important)

Topic	Rule
Product name	CVB-Office
Member price shown on the page	8,33 € net per vehicle per month = 100 € net per vehicle per year. This value must be editable in the admin panel.
How members pay	The amount is added to the yearly CVB membership fee (existing yearly fee + 100 € net per vehicle per year). CVB collects it. The page does not take payments.
Price confirmation	A visitor must tick a box that confirms the price before the form can be sent.
Free trial	Visitors who want to test first are sent to the Smarlps 14-day trial page (external link, opens in a new tab).
After a sign-up	The client gets an email and sets up the access with Smarlps himself. This manual step is outside this project.
Smarlps on the page	Shown as technology partner, in a positive way. No Smarlps prices, no comparison tables, no negative words.
Contact	By email only (no phone form, no chat).

3. Scope: what is in and what is out

3.1 In scope

ID	Item	Notes
S1	Public landing page (one scrolling page, 12 parts)	Section 5. Custom design in CVB look. Mobile first.
S2	German texts and placeholders	The client supplies final text. Lorem Ipsum is accepted as a placeholder. Draft German copy is in Appendix A.
S3	Sign-up form	Section 6. Email, number of vehicles, price box, privacy box.
S4	Saving requests and email alert	Every request is saved and an email goes to the client.
S5	Admin panel (German)	Section 8. Login, content editing, images, prices, requests, settings.
S6	SEO basics	Page title, description, share image, sitemap, clean structure.
S7	Security and privacy basics	HTTPS, safe login, spam protection, privacy-friendly set-up.
S8	Speed and device support	Targets in Section 9.
S9	Going live on cvb-office.de	Including redirects and a working email set-up.
S10	Handover	Source code, access, short admin guide or video, 30 days of bug-fix support.

ID	Item	Notes
S11	Preparation for 2027	Clean data structure and clear code only. The link itself is not built now.

3.2 Out of scope

Item	Why
Taking payments on the page	CVB invoices members through the yearly fee.
Member or visitor accounts (login for visitors)	Not requested.
Booking engine or Smarlps integration (API)	Smarlps runs the software. The page only links to the trial.
Link to the client's customer management tool	Planned for 2027 as a separate job.
The second website (a one-page site for another company of the client)	Separate brief later. Do not build it now.
Writing legal texts (imprint, privacy policy)	The client or his legal adviser provides them. You only link them.
Domain registration and logo design	The client owns the domain and the logos.
Professional copywriting and photography	The client provides text and photos. Draft copy is only a helper.
Ads, analytics, newsletter, blog, other languages	Not requested.
Changes to the existing CVB Webflow website	Managed by another provider.

> **Changes to the scope**
> If you think something is missing or something extra would help the client, write it down and send it to Web Mavien. Do not build it before it is approved.

4. Brand and design

4.1 Files received from the client

File	What it is	Technical details	Notes
CVB_Logo_2025.tif	Wide CVB logo: CARAVAN (dark green) and VERMIETER BUND (olive green), with a motorhome outline	TIFF, CMYK, 939 × 218 px	Too small and in CMYK for web use at full size. Ask for SVG, PDF or AI.
Dein_Abschnittstext.png	CVB-Office icon: rounded square with gold border, motorhome outline, letters CVB and the word Office in gold	PNG, RGB, 319 × 319 px	Small. Ask for a vector or larger file. Use it for the header, favicon and share image.

Logo rules: Do not stretch, recolour or crop the logos. Keep clear space around them. Use the CVB-Office icon as the main product mark on the page and the wide CVB logo in the footer and in the "About CVB" part.

4.2 Colours

These colours were measured from the logo files. They can differ a little because the TIFF is CMYK. Ask the client for the official colour codes, or read them from caravan-vermieter-bund.de with the browser developer tools.

Name	Approx. hex	Use
Dark olive green (CVB logo, CARAVAN)	#384808	Headlines, header, footer, main buttons
Olive green (CVB logo, second line)	#889028	Icons, small accents, hover states
Dark olive (CVB-Office icon outline)	#585828	Body text and lines (if more softness is wanted)
Gold (CVB-Office icon border and "Office")	#A09048	Borders, highlights, large decorative elements
White	#FFFFFF	Main background
Warm cream (suggestion)	#F4F2E6	Alternating section backgrounds

Accessibility note: Gold text on a white background is hard to read. Use dark olive for text. Use gold only for borders and large decorative parts. Check the contrast of every button and text (WCAG AA).

4.3 Fonts

- The client's fonts are not known yet. Check caravan-vermieter-bund.de and ask the client.
- The logo uses a friendly, rounded sans-serif letter style. If the client has no licensed font, use a free font with a similar feel (for example Nunito) and tell Web Mavien.
- Host fonts on the same server as the page. Do not load fonts from Google servers (privacy in Germany).

4.4 Look and feel

- Calm, friendly, trustworthy. A feeling of outdoors, travel and good organisation.
- Lots of white space, large readable text, rounded corners that match the rounded logo shapes.
- Real motorhome and outdoor photos. The client provides them. If none are available, use licensed stock photos and tell Web Mavien the source.
- Brand reference: caravan-vermieter-bund.de (look, tone, colours).
- Content reference: smarlps.de (only for ideas about content and order of sections). Do not copy its design, text, screenshots or images.

4.5 Buttons

Button	German label	Style	Action
Primary	CVB-Office buchen	Dark olive fill, white text	Scrolls to the sign-up form
Secondary	14 Tage kostenlos testen	White fill, dark olive border and text	Opens the Smarlps trial page in a new tab
Submit	CVB-Office jetzt anfragen	Same as primary	Sends the form

4.6 Screen sizes

Design mobile first. Many renters will open the page on a phone. The client also checks things on his phone.

Device	Width to test
Small phone	360 px
Large phone	414 px
Tablet	768 px
Laptop	1024 px to 1280 px
Large screen	1440 px and wider (content stays centred, maximum width about 1200 px)

5. Page structure and content

The page is one long scrolling page with 12 parts. The menu in the header jumps to the parts. The picture below shows the order. The table after it explains each part.

Figure 1: Page structure, top to bottom

No.	Part	What goes in it and what the rules are	Admin can edit
0	Header (sticky)	Stays at the top while scrolling. • CVB-Office icon (links to the top) • Menu: Funktionen, So funktioniert's, Preis, FAQ • Secondary button: 14 Tage kostenlos testen • Primary button: CVB-Office buchen • Phone: icon, menu icon and the primary button stay visible	Labels, trial link
1	Hero	• One H1 headline and 1 to 2 lines of intro text • Both buttons • One large image (motorhome handover scene or product picture) • Small trust line, for example: Ein Angebot des Caravan-Vermieter-Bund • Optional badges: Made in Germany, Gehostet in Deutschland (only if the client confirms)	All texts, image

No.	Part	What goes in it and what the rules are	Admin can edit
2	Problem and solution	Left: 4 daily problems of renters (long handovers on site; requests, bookings and contracts spread over email, Excel and paper; unclear prices and availability; gaps between request, contract, payment and handover). Right: 4 answers (digital pre-instruction by video and QR code; one place from request to handover; clear price logic with seasons, discounts and extras; clear processes and fewer questions).	Yes (list items)
3	Features	8 cards, each with icon, title and 1 to 2 sentences: • Bookings and utilisation at a glance • Booking widget for your own website • Clear price logic • Availability and minimum stay (no double bookings) • Digital contract signing • Confirmations and protocols as PDF • Customer and renter management • Vehicles and accessories Confirm with the client whether accounting is part of CVB-Office. If yes, add a ninth card.	Add, edit, reorder, hide
4	Two building blocks	Block A, digital pre-instruction: renters watch short videos on their phone, QR codes sit in the vehicle, an AI assistant answers questions about the rented vehicle, up to 50 % time saved per handover (a Smarlps claim, confirm before use). Block B, rental office: all requests, bookings, contracts, payments and handovers in one place, live availability and season prices, digital contract with PDF, several locations possible. The client decides whether the name Smarlps Go! stays or gets a CVB name (open question).	Yes
5	How it works	4 numbered steps with simple icons: 1. Receive request 2. Manage booking 3. Close contract 4. Document handover (photos, damage, signature)	Yes
6 + 7	Benefits and audience	6 benefit tiles: less effort, faster processing, full transparency, professional look, no gaps between steps, easy start. 4 audience tiles: motorhome and camper renters; renters of vehicles and objects (trailers, e-bikes, equipment); businesses with digital booking; several locations or groups.	Yes
8	Price and trial box	One clear box. • Shows the member price from the admin settings, for example: 8,33 € netto pro Fahrzeug und Monat (100 € netto pro Fahrzeug und Jahr) • Note: the amount is charged in addition to the yearly CVB membership fee • Short promise line: 14 Tage kostenlos testen, keine automatische Verlängerung (confirm with Smarlps) • Both buttons Never show Smarlps prices.	Prices and texts
9	Sign-up form	See Section 6 for every detail.	Texts, success message

No.	Part	What goes in it and what the rules are	Admin can edit
10	FAQ	Accordion with 6 to 8 questions. Each can be opened and closed. Keyboard friendly. Draft questions are in Appendix A.	Add, edit, reorder, delete
11	About CVB	Short text about CVB and the founder as contact. Optional photo. Fact to use: more than 1,000 vehicles supported. Link: Mehr über den CVB (caravan-vermieter-bund.de). Contact by email only. Default: info@caravan-vermieter-bund.de, editable.	Yes
12	Footer	• CVB logo • Links: Impressum, Datenschutzerklärung (CVB pages or own pages, open question) • Contact email • Social links as on the CVB site: Facebook, Instagram, LinkedIn • Line: Technologiepartner Smarlps (text, or logo if approved) • Copyright line	Links, texts

5.1 Extra elements

Element	Rule
Favicon and share image	Made from the CVB-Office icon. Share image about 1200 × 630 px.
404 page	Friendly German message with a button back to the start page.
Thank-you state	After a successful sign-up the form shows the success message without reloading the page.
Cookie notice	Only if you use anything that needs consent. Preferably use nothing that does (no analytics, no external embeds).
Smooth scrolling	Menu links scroll smoothly to each part. Respect the reduced-motion setting of the device.
Animations	Small and calm only (for example fade in). Nothing that slows the page.

6. Sign-up form

The form is the most important part of the page. It must be short, clear and safe. The client only needs an email address, the number of vehicles and the confirmation of the price.

6.1 Fields

Field	Type	Required	Rules	German label
Email	Email input	Yes	Valid email format, maximum 254 characters, saved in lower case	E-Mail-Adresse
Number of vehicles	Whole number	Yes	From 1 to 999. Number keyboard on phones.	Anzahl Fahrzeuge
Price confirmation	Checkbox	Yes	Must be ticked. Text comes from the price settings (6.2).	See 6.2
Privacy consent	Checkbox	Yes (recommended, confirm with client)	Links to the privacy policy	Ich habe die Datenschutzerklärung gelesen und bin einverstanden, dass meine Angaben zur Bearbeitung meiner Anfrage gespeichert werden.
Spam trap (honeypot)	Hidden text field	No	Must stay empty. If filled, reject silently.	Not visible

Do not add other fields (for example name, company or phone) without approval. The client said he only needs the email address.

6.2 Price confirmation text

German text (default). The numbers are filled in automatically from the price settings in the admin panel:

> Ich bestätige, dass CVB-Office 8,33 € netto pro Fahrzeug und Monat kostet (100 € netto pro Fahrzeug und Jahr) und dass dieser Betrag zusätzlich zur jährlichen CVB-Mitgliedsgebühr berechnet wird.

- If the client changes the price in the admin panel, this text and the price box on the page change automatically.
- Save the exact text that the visitor accepted together with the request (proof).

6.3 How the form behaves

Step	Behaviour
1	Check the fields in the browser first (fast feedback) and again on the server (safe).
2	While sending, disable the button and show a small loading state. Prevent double clicks.
3	On success, show the success message in place of the form and move the focus to it (for screen readers). Do not reload the page.
4	On errors, show a clear German message next to the field and move the focus to the first error.

Step	Behaviour
5	Spam protection: honeypot field, minimum time check (a form sent in under 3 seconds is rejected), and a limit of 5 requests per hour per visitor address. Add a privacy-friendly captcha only if spam becomes a problem.
6	Duplicates: if the same email sends again within 10 minutes, show the success message but do not save a second request or send a second email.
7	If the alert email cannot be sent, still save the request, still show success to the visitor, and mark the request in the admin panel as "E-Mail nicht gesendet".

6.4 What the server does after a valid request

1. Save the request in the database (data in Appendix B).
2. Send an alert email to the client (text in Appendix C).
3. Optional, if the client agrees: send a short confirmation email to the visitor (Appendix C).
4. Write a log entry (no personal data beyond what is needed).

6.5 Messages (German)

Situation	Text
Success	Vielen Dank! Deine Anfrage ist bei uns eingegangen. Wir melden uns in Kürze bei Dir und richten Deinen Zugang ein.
Email not valid	Bitte gib eine gültige E-Mail-Adresse ein.
Vehicles missing	Bitte gib die Anzahl Deiner Fahrzeuge an (Zahl ab 1).
Price box not ticked	Bitte bestätige den Preis, damit wir Deine Anfrage bearbeiten können.
Privacy box not ticked	Bitte stimme der Datenschutzerklärung zu.
Too many requests	Du hast zu viele Anfragen gesendet. Bitte versuche es in einer Stunde noch einmal.
Server error	Das hat leider nicht geklappt. Bitte versuche es später noch einmal oder schreib uns an info@caravan-vermieter-bund.de.

The success message and the contact email in the error message must be editable in the admin panel.

7. Visitor flow

This is the path a visitor can take. There are two options: test first (external Smarlps trial) or sign up with the form.

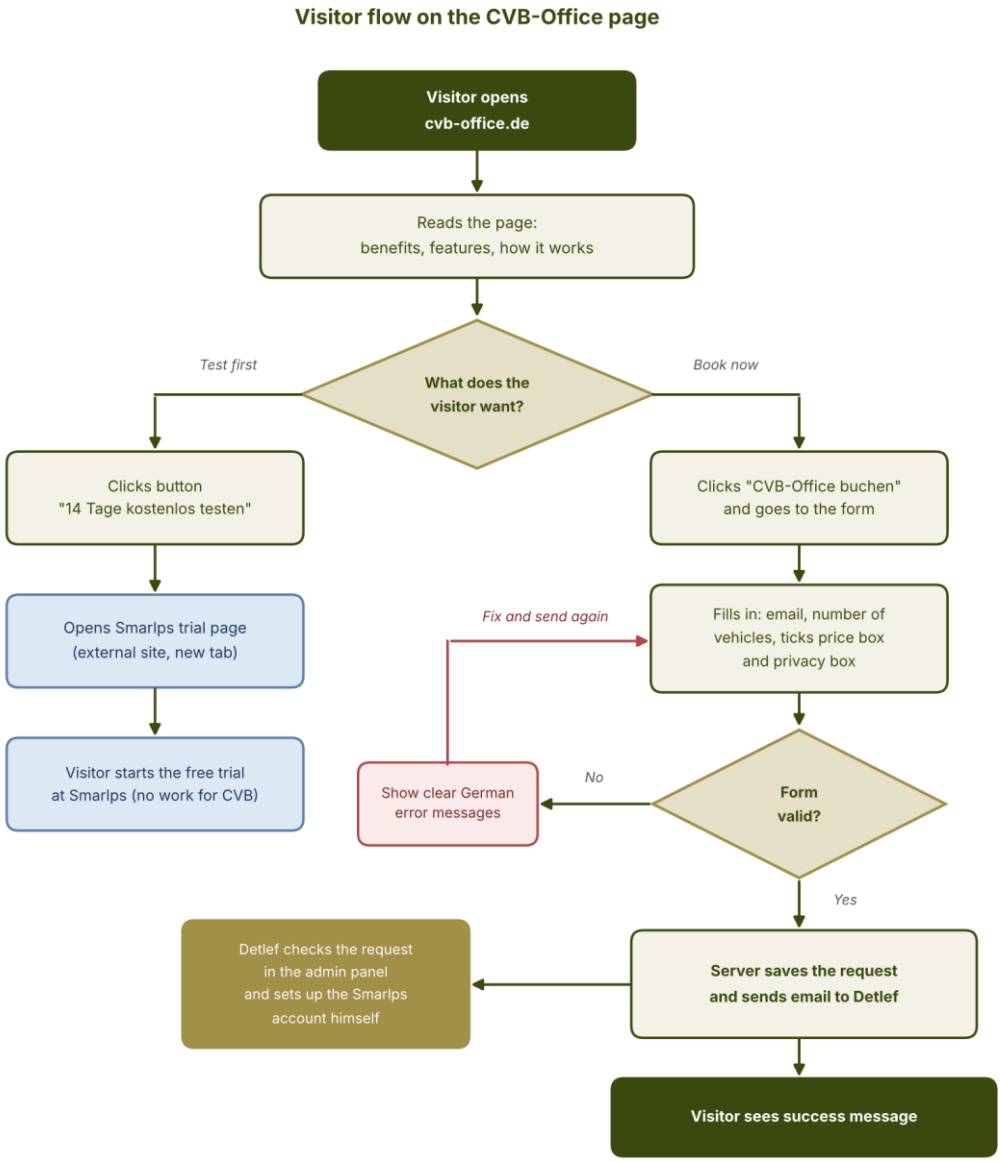

Figure 2: Visitor flow on the CVB-Office page

Step	What happens	Who does it
F1	Visitor opens cvb-office.de (from the CVB website, a link, an email or a trade fair)	Visitor
F2	Visitor reads the page	Visitor
F3a	Visitor wants to test first: clicks 14 Tage kostenlos testen. The Smarlps trial page opens in a new tab.	Visitor
F3b	Visitor wants to book: clicks CVB-Office buchen. The page scrolls to the form.	Visitor
F4	Visitor fills in email and number of vehicles and ticks the price box and the privacy box	Visitor

Step	What happens	Who does it
F5	The form checks the data. If something is wrong, a German message shows and the visitor can fix it.	Page
F6	The server saves the request and sends an alert email to the client	Page
F7	The visitor sees the success message	Page
F8	The client reads the email, opens the request in the admin panel and sets the status to In Bearbeitung	Client
F9	The client sets up the Smarlps access for the member (outside this project)	Client
F10	The client sets the status to Erledigt	Client

8. Admin panel

The client is not technical. The admin panel must feel like a simple settings page on a phone app. He changes things, presses one button, and sees that it is saved.

8.1 Principles

- All labels, buttons, messages and help texts are in German. No technical words.
- Works well on a phone, a tablet and a computer. The client often works from his phone.
- One clear Save button per screen. After saving, show Gespeichert.
- Short help text under every field, for example: So wird dieser Text auf der Seite angezeigt.
- Ask before deleting anything (Wirklich löschen?).
- The client never has to write HTML or code. Text fields allow simple formatting only (bold, line breaks, links).
- A link Seite ansehen opens the live page in a new tab from every screen.

8.2 Screens

Priority: M = Must have, S = Should have, C = Could have (only if time allows).

Screen	What the client can do	Prio
Login	Email and password. Forgot password by email. Lock for 15 minutes after 5 wrong tries. Optional two-step login with an authenticator app.	M (two-step: S)
Dashboard	See the number of new requests and the last 5 requests. Big buttons: Seite bearbeiten, Anfragen, Einstellungen.	M
Requests (list)	Table with date, email, vehicles and status. Search by email. Filter by status and date. Sort by date. Export as CSV (semicolon separated, opens correctly in German Excel).	M
Request (detail)	See all saved data, including the price text the visitor accepted and the time. Change status: Neu, In Bearbeitung, Erledigt. Add a private note. Delete the request.	M
Edit page	List of the 12 parts. Open a part to edit texts, images, button labels and links. Add, edit, reorder and hide list items (feature cards, steps, benefits, audience tiles).	M
Prices	Fields for price per vehicle per month (net) and per year (net) and the note text. Changing them updates the price box and the price confirmation text.	M
FAQ	Add, edit, delete and reorder questions and answers.	M
Images	Upload JPG, PNG, WebP or SVG (maximum 10 MB). Automatic resize and compression. Alt text field. Replace a file without breaking the page.	M
Settings	Email address(es) for alerts, sender name, trial link, CVB website link, Impressum link, Datenschutz link, social links, contact email, page title, page description, share image, favicon, success message.	M
Account	Change own password and email.	M
Version history	Keep the last 20 versions of each part. Restore an old version with one click.	S
Preview before publish	Preview changes before they go live.	S

Screen	What the client can do	Prio
Draft and publish	Work on changes without showing them. Default is that Save means live.	C
More users	Add a second admin user.	C

8.3 What the client can and cannot change

Can change (no developer needed)	Cannot change (stays in code)
• All visible text • All images and logos • Button labels and links • Lists: features, steps, benefits, audience, FAQ • Prices and the price confirmation text • Page title, description and share image • Alert email address and trial link	• Page layout and design • Colours and fonts • Form logic and security rules • The order of the 12 parts (unless you add this as an extra)

8.4 Admin quality rules

- Passwords: at least 12 characters, stored hashed (Argon2 or bcrypt). Never in plain text.
- Session ends after 8 hours of no activity.
- Admin address is not linked from the public page.
- Every save is logged with date and user.
- Test the admin panel on a real phone before handover.

9. Technical requirements

9.1 How the parts connect

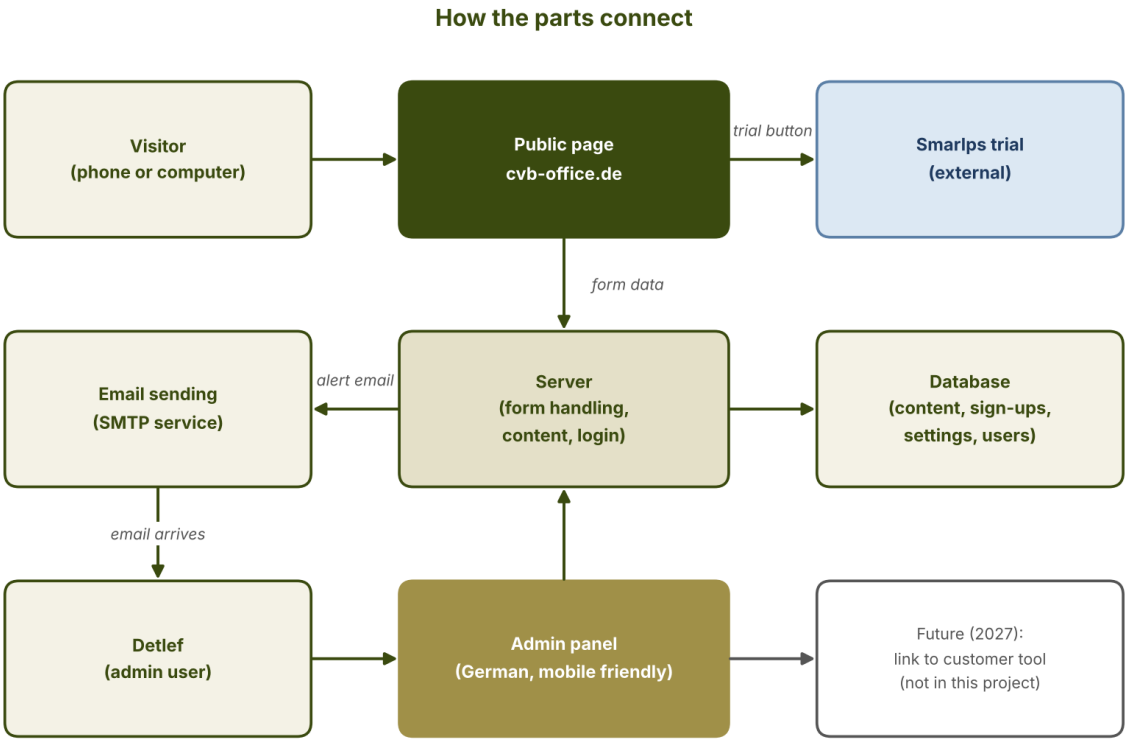

Figure 3: System map

Freedom of choice: You may choose the tools and language, if all requirements in this document are met. The code must be custom (no Webflow, Wix, Bubble or similar builder). Tell Web Mavien about any tool that has a monthly or yearly fee before you use it.

Needed: server-side code for the form and the admin panel, a database, and file storage for images. A simple, well-known set-up is better than a clever one, because the project will be handed over.

9.2 Domain, hosting and backups

Topic	Requirement
Domain	cvb-office.de belongs to the client. Ask for DNS access or a person who can set the records. Redirect www to the main address (or the other way round) with a permanent redirect.
Hosting	A server in Germany or the EU is preferred (privacy). Hosting costs are small and paid separately by the client. Tell Web Mavien the monthly cost of your set-up.
HTTPS	Valid certificate, renewed automatically. All traffic forced to HTTPS.
Staging	A private test version (staging) for client review before going live. Protect it with a password.
Backups	Daily backup of database and uploaded files. Keep at least 7 days. Test a restore once.
Monitoring	Uptime check with an alert email to Web Mavien. Error logging.

9.3 Speed targets

Measure	Target (mobile, normal 4G)
Largest content shown (LCP)	Under 2.5 seconds
Layout shifts (CLS)	Under 0.1
Response to taps (INP)	Under 200 ms
Lighthouse scores	Performance 90+, Accessibility 95+, Best Practices 95+, SEO 95+
Total page weight (first load)	Aim for under 1.5 MB
Images	Modern formats (WebP or AVIF), correct sizes, lazy loading below the first screen

9.4 Browsers and devices

Latest two versions of Chrome, Safari, Firefox and Edge. iPhone Safari and Android Chrome. Test on at least one real iPhone and one real Android phone.

9.5 SEO basics

- Language set to German (de-DE). One H1 only. Clean heading order.
- Page title and meta description (editable in the admin panel).
- Open Graph and Twitter share tags with the share image.
- Canonical link, sitemap.xml and robots.txt.
- Organization and SoftwareApplication structured data (optional but welcome).
- Meaningful alt text for every image. Readable link texts.

9.6 Accessibility

- Aim for WCAG 2.1 level AA.
- Contrast checked for all text and buttons.
- Everything usable with the keyboard, with a visible focus outline.
- Form fields have real labels. Errors are announced to screen readers.
- Respect the reduced-motion setting.

9.7 Security

- Check and clean all input on the server. Use safe database queries.
- Protect forms and admin actions against CSRF.
- Secure cookies (HttpOnly, Secure, SameSite).
- Rate limits on the form and on the login.
- Security headers (for example Content-Security-Policy, X-Content-Type-Options, Referrer-Policy).
- Keep secrets out of the code repository. Use environment settings.
- Upload checks: allowed file types only, size limit, safe file names.

9.8 Privacy (GDPR)

This is practical advice, not legal advice. The client should confirm the legal texts with his adviser.

- Save only what is needed: email, number of vehicles, consent times, status, note.
- No third-party trackers, no analytics, no external fonts, no external maps or videos. This way no cookie banner is needed for visitors.
- The admin session cookie is needed for the function and is allowed.

- Do not save full IP addresses. If you need them for spam control, save a short-lived hash only.
- The admin panel can delete a request completely (right to erasure).
- Ask the client how long requests should be kept (open question).

9.9 Email delivery

- Send emails through an authenticated SMTP service, not through the default server mail.
- Set SPF, DKIM and DMARC for the sending domain so emails do not land in spam.
- Sender name: CVB-Office. Sender address to be agreed (for example no-reply on the CVB-Office domain).
- Plain text and simple HTML version. Test with Gmail, Outlook and GMX or Web.de.

9.10 Ready for 2027

In 2027 the client may link CVB-Office sign-ups to his customer management tool. Do not build this now, but prepare:

- Store requests in a clean, structured table with a status field.
- Keep form handling in its own module, so a connection (for example a webhook) can be added later.
- Write short code comments and a README that explains the structure.

10. Content plan: who gives what

Content	Who provides it	Status	Note
Logos	Client	Received (2 files)	Vector versions still needed
Brand colours and fonts	Client	Not received	Fallback: measured colours in 4.2
German page text	Client	Client will provide	Client may reuse text from his current site. Lorem Ipsum is accepted until then.
Draft German copy	Web Mavien	Appendix A	Only a helper. Replace with client text when it arrives.
FAQ answers	Client approves	Draft in Appendix A	Check each answer with the client
Photos	Client or stock	Not received	Tell Web Mavien about any stock source
Smarlps images and screenshots	Needs permission	Not approved	Do not use without written approval
Imprint and privacy policy	Client	Not received	Link only. Decide if CVB pages are reused.
Trial link	Client	Known	https://ausprobieren.smarlps.de (confirm final link and any CVB tracking code)
Alert email address	Client	Not received	Needed before testing the form

> **Content rule**
> Do not write marketing claims yourself. Every claim on the page (for example time saved, Made in Germany, hosted in Germany) must come from the client or be confirmed by him.

11. Deliverables and handover

No.	Deliverable	Details
D1	Finished website on cvb-office.de	Live, tested, with redirects, HTTPS and working email
D2	Admin access	Admin login for the client and a backup admin login for Web Mavien
D3	Source code	In a Git repository with a clear README (how to run, deploy and back up)
D4	Handover notes	List of all services, accounts, domains and monthly costs
D5	Admin guide	Short guide in German with screenshots, or a screen video of about 10 minutes
D6	Staging access	Until the project is accepted
D7	30 days of support	Bug fixes and questions after going live. New features are not included.

11.1 Working method

- All talks with the client go through Web Mavien. Send previews as links, not as files.
- Send a short status note at least every 2 working days.
- Before each milestone, check the work against the checklist in Section 13.
- Changes inside the described scope are handled until the client is happy. Changes outside it need approval first.

12. Timeline and milestones

Planned start: Monday 9 November 2026. The client was promised a first visual update within 2 to 3 working days after the start, and the full launch about 2 to 3 weeks after the start. Dates depend on how fast the client answers and sends content.

No.	Milestone	Target
M0	Kick-off: read this brief, ask open questions, get access (domain, hosting, logos)	Mon 9 Nov 2026
M1	First preview: top of the page (header and hero) in CVB look, desktop and phone	Wed 11 to Thu 12 Nov 2026
M2	Full design approved by the client	About end of week 1
M3	Public page built and responsive (staging)	Week 2
M4	Form, database and alert email working (staging)	Week 2
M5	Admin panel working (staging)	Week 2 to 3
M6	Content and images loaded, full test against the checklist	Week 3
M7	Client review and changes	Week 3
M8	Go-live on cvb-office.de	About 2 to 3 weeks after start
M9	30 days of support	After go-live

Important: The first preview (M1) is a promise to the client. Please plan for it from day one and send it to Web Mavien on time.

13. Acceptance checklist

The project is accepted when every line below is checked. Please test before you tell Web Mavien the work is ready.

No.	Check	Done
A1	Public page shows all 12 parts in the right order, in German	☐
A2	Logos and colours match the CVB brand, no Smarlps look	☐
A3	Page looks right at 360, 414, 768, 1024 and 1440 px	☐
A4	Both buttons work everywhere (header, hero, price box). The trial link opens in a new tab.	☐
A5	Menu links scroll to the correct parts	☐
A6	Form accepts a valid request and shows the success message	☐
A7	Form shows the right German message for every wrong input	☐
A8	Price box must be ticked. The text matches the admin prices.	☐
A9	Spam trap, time check and rate limit work	☐
A10	A saved request appears in the admin panel with date, email, vehicles, accepted text and times	☐
A11	Alert email arrives in Gmail, Outlook and GMX or Web.de, not in spam	☐
A12	Admin login works. Wrong passwords are limited. Password reset works.	☐
A13	Client can change a text, an image, a button label, a price and an FAQ answer, and sees it live	☐
A14	Changing the price updates the price box and the form text	☐
A15	Requests can be filtered, searched, given a status and note, exported as CSV and deleted	☐
A16	Admin panel works on a real phone	☐
A17	Lighthouse targets from 9.3 are met on mobile	☐
A18	Keyboard use, focus outline and contrast pass a check	☐
A19	Title, description, share image, sitemap, robots and canonical are set	☐
A20	HTTPS works, redirects work, security headers are set	☐
A21	No third-party trackers, fonts or embeds are loaded	☐
A22	Impressum and Datenschutz links work	☐
A23	404 page works	☐
A24	Backups run and one restore was tested	☐
A25	Handover notes, README and admin guide are delivered	☐

14. Open questions

Please send these to Web Mavien at the start. Until they are answered, use the default in the last column.

No.	Question	Why it matters	Default until answered
Q1	Official brand colours and fonts, or a brand guide?	Exact look	Measured colours (4.2), rounded sans-serif font
Q2	Vector logos (SVG, PDF or AI) and a larger CVB-Office icon?	Sharp logos on all screens	Use the files received
Q3	Final German text, or use text from the current site?	Content	Lorem Ipsum or the draft copy in Appendix A
Q4	Imprint and privacy: reuse the CVB pages or own pages for cvb-office.de?	Legal compliance	Link to the CVB pages
Q5	Who controls the domain DNS? Where should it be hosted?	Going live	Hosting in Germany or the EU
Q6	Which email address(es) get the alert? Which sender address?	Form works and mail is not marked spam	Alert to info@caravan-vermieter-bund.de
Q7	Send a confirmation email to the visitor?	Visitor experience	No
Q8	May the Smarlps name, the name Smarlps Go!, logo or images be used? Which wording for the partner note?	Brand and permission	Text mention only: Technologiepartner Smarlps
Q9	May claims like Made in Germany, hosted in Germany and up to 50 % time saved be shown?	These are Smarlps claims	Do not show until confirmed
Q10	Is accounting (Buchhaltung) part of CVB-Office?	Feature list is correct	Do not list it
Q11	Final trial link and any CVB tracking code?	Trial counts for CVB	https://ausprobieren.smarlps.de
Q12	How long should requests be stored? Any analytics wanted?	Privacy	No analytics. Keep requests until the client deletes them.
Q13	Which photos should be used?	Look	Licensed stock photos, source noted
Q14	Is a link "Design und Umsetzung" for the developer wanted in the footer?	Footer	No

15. Risks and notes

Risk	What to do
Logo files are small and CMYK	Ask for vector files early. Until then, test the logos at all sizes and do not enlarge them.
Final text arrives late	Build with the draft copy. Keep all text editable so late changes are easy.
Domain or DNS access is slow	Ask at kick-off. Build and review on staging in the meantime.

Risk	What to do
Smarlps claims or images are not approved	Leave them out. Do not copy anything from smarlps.de.
Email goes to spam	Set SPF, DKIM and DMARC. Test early with real addresses.
The client asks for extra features during review	Write them down and pass them to Web Mavien. Do not build before approval.
The admin panel feels too complex	Test it with a non-technical person. Remove anything that is not needed.

Appendix A: German draft copy

Draft texts to use as placeholders. The client's own text replaces them. They use the informal "Du" form, like the CVB website. Mark: draft.

Place	Draft text (German)
Hero headline (H1)	CVB-Office: Dein digitales Vermiet-Office
Hero text	Anfrage, Buchung, Vertrag und Übergabe an einem Ort. Entwickelt für Wohnmobil- und Caravan-Vermieter im Caravan-Vermieter-Bund.
Trust line	Ein Angebot des Caravan-Vermieter-Bund
Problem headline	Vermietung kostet Zeit. CVB-Office gibt sie Dir zurück.
Problems	• Lange Einweisungen vor Ort bei jeder Übergabe • Anfragen, Buchungen und Verträge verteilt auf E-Mail, Excel und Zettel • Unklare Preise, Saisonaufschläge und Verfügbarkeiten • Brüche zwischen Anfrage, Vertrag, Zahlung und Übergabe
Solutions	• Digitale Vorab-Einweisung per Video und QR-Code • Eine Lösung von der Anfrage bis zur Übergabe • Klare Preislogik mit Saison, Rabatten und Zubehör • Klare Abläufe, weniger Rückfragen, ein professioneller Auftritt
Features (card titles)	• Buchungen und Auslastung im Blick • Buchungswidget für Deine Website • Klare Preislogik • Verfügbarkeit und Mindestdauer • Digitaler Vertragsabschluss • Bestätigungen und Protokolle als PDF • Kunden- und Mieterverwaltung • Fahrzeuge und Zubehör
Feature text (example)	Buchungswidget für Deine Website: Deine Kunden fragen direkt auf Deiner eigenen Seite an oder buchen dort.
Block A title and text	Digitale Vorab-Einweisung: Deine Mieter lernen ihr Fahrzeug schon vor der Übergabe kennen, per Video auf dem Smartphone und per QR-Code im Fahrzeug.
Block B title and text	Dein Vermiet-Office: Anfragen, Buchungen, Verträge, Zahlungen und Übergaben an einem Ort, immer aktuell und übersichtlich.
How it works	1. Anfrage erhalten 2. Buchung verwalten 3. Vertrag abschließen 4. Übergabe dokumentieren
Benefits	• Weniger Aufwand • Schnellere Bearbeitung • Volle Transparenz • Professioneller Auftritt • Keine Medienbrüche • Einfacher Einstieg
Audience	• Wohnmobil- und Camper-Vermieter • Vermieter von Fahrzeugen und Objekten • Betriebe mit digitalen Buchungsprozessen • Mehrere Standorte und Verbünde

Place	Draft text (German)
Price box	8,33 € netto pro Fahrzeug und Monat (100 € netto pro Fahrzeug und Jahr). Der Betrag wird zusätzlich zur jährlichen CVB-Mitgliedsgebühr berechnet.
Trial line	14 Tage kostenlos testen, keine automatische Verlängerung (vor Verwendung bestätigen lassen).
Form heading	CVB-Office buchen
Form intro	Trag Deine E-Mail-Adresse und die Anzahl Deiner Fahrzeuge ein. Wir melden uns bei Dir und richten Deinen Zugang ein.
About CVB	Der Caravan-Vermieter-Bund unterstützt Wohnmobil-Vermieter mit Wissen, Versicherungen und einem starken Netzwerk. Heute betreuen wir mehr als 1.000 Fahrzeuge.
Partner note	Technologiepartner: Smarlps

FAQ drafts (the client must approve each answer)

Question	Draft answer
Für welche Art von Vermietung ist CVB-Office geeignet?	Für Wohnmobile, Camper, Wohnwagen und Anhänger. Überall, wo Anfragen, Buchungen, Verträge und Übergaben anfallen.
Wie schnell kann ich starten?	Nach der Einrichtung Deines Zugangs kannst Du direkt loslegen. Du brauchst keine eigene IT und keine lange Schulung.
Was kostet CVB-Office?	8,33 € netto pro Fahrzeug und Monat, also 100 € netto pro Fahrzeug und Jahr.
Wie wird CVB-Office bezahlt?	Der Betrag wird zusätzlich zu Deiner jährlichen CVB-Mitgliedsgebühr berechnet.
Kann ich CVB-Office erst testen?	Ja. Du kannst 14 Tage kostenlos testen. Es gibt keine automatische Verlängerung. (bestätigen lassen)
Kann ich CVB-Office in meine Website einbinden?	Ja. Mit dem Buchungswidget bindest Du Verfügbarkeit, Preise und Anfragen direkt in Deine Website ein.
Geht das auch mit mehreren Standorten?	Ja. CVB-Office unterstützt mehrere Standorte und Verbünde mit klarer Trennung. (bestätigen lassen)
Was passiert mit meinen bestehenden Buchungen?	Bestehende Buchungen lassen sich abbilden, damit Du alles an einem Ort hast. (bestätigen lassen)

Appendix B: Data model

Suggested structure. You may adjust names and types if the content stays the same.

Sign-up request

Field	Type	Example or note
id	Unique id	Automatic
created_at	Date and time	2026-11-12 10:41
email	Text	name@example.com (lower case)
vehicle_count	Whole number	4
price_monthly_net_at_signup	Number	8.33 (price at the time of sign-up)
price_yearly_net_at_signup	Number	100.00
price_consent	Yes or no	Yes
price_consent_text	Text	Exact German text the visitor accepted
price_consent_at	Date and time	Same as created_at
privacy_consent	Yes or no	Yes
privacy_consent_at	Date and time	Same as created_at
status	Choice	neu, in_bearbeitung, erledigt
notes	Text	Private note by the client
email_sent	Yes or no	Alert email sent?
email_error	Text	Error message if sending failed

Other tables

Table	Main fields
content_block	key, type (text, image, list, button), value, updated_at, updated_by
content_version	block key, value, saved_at, saved_by (last 20 per block)
feature_card, step, benefit, audience_item	id, title, text, icon, sort_order, visible
faq_item	id, question, answer, sort_order, visible
media_file	id, file name, alt text, size, type, uploaded_at
setting	key, value (alert emails, trial link, prices, links, SEO texts, success message)
admin_user	id, email, password_hash, created_at, last_login, optional two-step secret

Appendix C: Email texts (German)

1. Alert email to the client

Part	Text
Subject	Neue CVB-Office-Anfrage: {E-Mail} ({Anzahl} Fahrzeuge)
Body	Hallo Detlef, über cvb-office.de ist eine neue Anfrage eingegangen. E-Mail: {E-Mail} Anzahl Fahrzeuge: {Anzahl} Eingegangen am: {Datum und Uhrzeit} Preis bestätigt: Ja ({Preistext}) Zur Anfrage im Admin-Bereich: {Link} Viele Grüße CVB-Office

2. Confirmation email to the visitor (only if approved, Q7)

Part	Text
Subject	Deine Anfrage zu CVB-Office
Body	Hallo, vielen Dank für Deine Anfrage zu CVB-Office. Wir haben sie erhalten und melden uns in Kürze bei Dir, um Deinen Zugang einzurichten. Anzahl Fahrzeuge: {Anzahl} Viele Grüße Dein CVB-Team

Appendix D: Glossary

Word	Meaning
CVB	Caravan-Vermieter-Bund, the client's network for motorhome and caravan renters
CVB-Office	The product name for members. The digital rental office.
Smarlps	The German software company behind CVB-Office, technology partner of CVB
Smarlps Go!	Smarlps name for the digital pre-instruction (videos, QR codes, AI help)
Landing page	One page made to explain one offer and get one action
Hero	The first big part at the top of a page
Admin panel	The private area where the client edits the page and reads requests
Sign-up request	What a visitor sends with the form
Net price	Price without VAT

Word	Meaning
Staging	A private test copy of the site before it goes live
Honeypot	A hidden form field that only spam robots fill in
GDPR	The European data protection law (DSGVO in German)
WCAG	Rules for making websites usable for everyone
